

# Benchrun Collections

## Cool Crops Benchrun Collection

For Grande™ production in 4" – 5" containers

### Criteria:

- A mix of colors and top-selling varieties.
- Four to five weeks in a Grande™ container from a Supernova® 42 liner (unless otherwise noted).
- Moderate water requirements.
- Similar PGR (plant growth regulator) rates:
  - 1ppm Bonzi® (paclobutrazol) drench two weeks after transplant.
  - 5ppm – 10ppm Sumagic® (uniconazole) spray as needed after that.
- Rooting out temperatures: 65 F night, 72 F day. Growing on temperatures: 65 F night, 68 F day.
- Read and follow specific cultural recommendations from the Supernova Culture Guide.
- Refer to specific crop culture guides for additional information.
