Supernova® 28 Thriller™

Supernova® 28 Thriller™

Supernova® 50

Supernova® 52

50 Liner

72 Liner

104 Liner

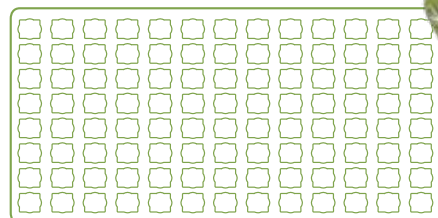

104 Liners

Our 104 Liners are hand pinched and grown bright and cool for vigorous, reliable growth and full branching. With more plants per box, this size has increased value in shipping and reduced plastic waste compared to other industry standard sizes. The 104 Liner is versatile and can be used for large container crops, such as hanging baskets and patio pots, along with small container crops.

BRIGHT LIGHTS™ GRANDE™
from a 104 Liner

104 Liner Tray

104 Liner

20" x 10" x 1.5"

Perfect for hanging baskets, gallon and small container production.

24% more plants per tray. Plug volume – 1.23 Cu inches.

"Endless" tray format for automated transplanting.

Trays per box: 8

(except Grasses)

Supernova® Liners

Supernova Liners are programmed liners with a treatment of intensive lighting, spacing to encourage growth, pinching, PGRs and heat — all of which help the liners flower faster and consistently with thicker branching.

SUPERTUNIA® LOVIE DOVIE™ GRANDE™
from a SUPERNOVA® Liner

Supernovas® need less attention and are faster to flower, so they are a great way to save production time and labor. They take only 4 to 5 weeks to finish in a 4-in container, and need no pinching or PGRs. That's much quicker than typical liners that take 7 to 10 weeks to be ready for market. Growers of all sizes finish plants early and add an extra turn to their season.

Brian Bourdon

Operation Manager of Offsites & Crop Supply Chain

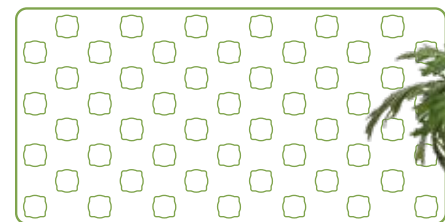

Supernova® Liners

Only Supernova® Liners are treated to flower at the same time and come bud-initiated with multiple breaks for these advantages:

- Shorter crop times
- Consistent and faster flowering
- Less pinching & fewer PGRs
- Increased branching

SUPERTUNIA® GRANDE™
from a SUPERNOVA® 52 Liner

Supernova® 52

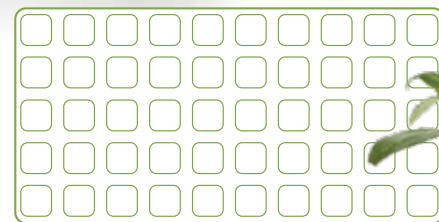

20" x 10" x 1.5"

Fastest turns for 4.25 Grande™ to 1.0 GL Royale™.

Better branching and initiated buds for more blooms, more quickly.

Offered in varieties that benefit from Supernova treatment.

Trays per box: 8

Supernova® 50

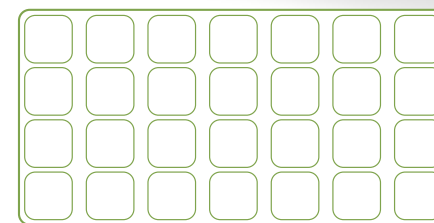

20" x 10" x 1.625"

Fastest turns for 4.25 Grande™ to 1.0 GL Royale™.

Timed flower initiation with a larger, developed root system for early consistent flowering.

Offered in Infinity® *New Guinea Impatiens* and SunPatiens® *Impatiens*.

Trays per box: 8

Supernova® 28 Thriller™

20" x 10" x 3.175"

Thrillers or center features of combinations; larger branded container production like 1.0 GL.

A larger, well-developed root system provides a jump-start to keep up with multiple plugs in combinations.

Offered in varieties with the potential to be outgrown in combinations.

Trays per box: 4

DALINA® 1.0 GL ROYALE™
from a SUPERNOVA® 28 Liner

Specialty Liners

These sizes are chosen for specific crops to produce larger, stronger plants with a more consistent finish time.
